Oxoviflex® is high-quality bis(2-ethylhexyl) terephthalate used in PVC and polymers processing as well as in paint and varnish industry. It features particularly good physical and chemical properties and serves as general purpose plasticizer for vast array of flexible PVC products. Oxoviflex® is environmentally safe and is not subjected to any legal restrictions. Oxoviflex® makes things flexible, functional and friendly in everyday use. Due to superior purity Oxoviflex® can be successfully applied to sensitive applications as toys and food contact materials.

Oxoviflex® is completely safe in terms of CLP classification and in most cases it can substitute phthalate plasticizers.

Oxoviflex® is an oily liquid, colourless, with no mechanical impurities.

Oxoviflex® is REACH registered according to EC regulation No. 1907/2006.
